15. A **career counseling programme** was organized in our college in association with **Cadmax Academy Gulbarga** on 29th Oct. 2019.

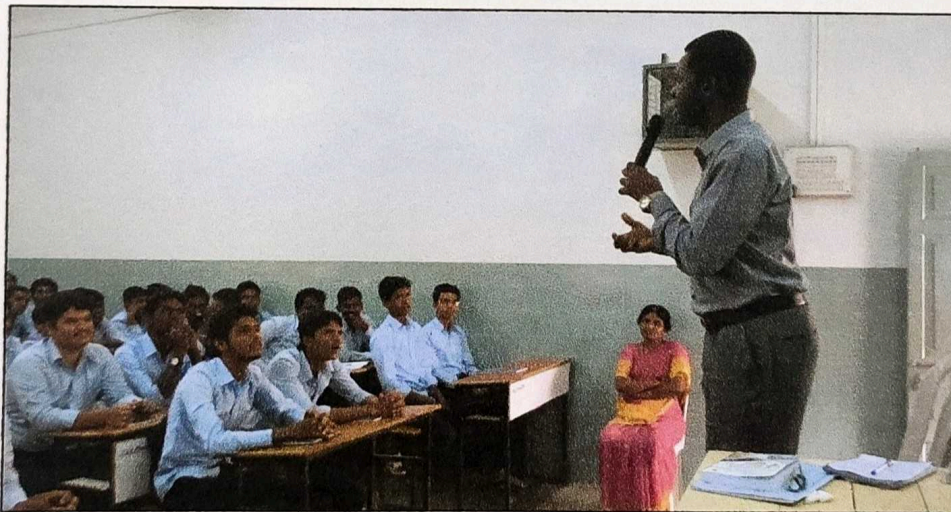

Jagan Hugar from Cadmax in his presentation said that Career counselling is provided by career counsellors to help individuals choose an appropriate career based on their interests, skills and abilities.

The main objective of career counselling is to help students pick a field that matches with their abilities and skills. With innumerable career options, career counselling has become an essential part of our life.

Students after completing their matriculation are often indecisive of what to do further due to social pressure, lack of parental guidance, multiple career options, ignorance of personal potentials etc.

Career counsellors cater to these issues effectively. Although career counselling is vital to all age groups, teenagers can benefit most from it. Besides students, it also guides employees who have already chosen a career and are not satisfied with it.

These individuals are redirected towards their goals and are given insight into their professional orientation. Career counsellors also link students to experts to encourage and support the students. Therefore a lot of importance is given to career counselling.
